## Create Stored Procedure TSQL Tutorial

TSQL Tutorial

[Like](#) [Share](#)

### Create Procedure Example:

 [GO](#)

#### Customers Table

| CUSTOMER_ID | CUSTOMER_NAME | CUSTOMER_TYPE |
|-------------|---------------|---------------|
| 1           | CUSTOMER_1    | CC            |
| 2           | CUSTOMER_2    | I             |
| 3           | CUSTOMER_3    | SM            |
| 4           | CUSTOMER_4    | CC            |

#### Contracts Table

| CONTRACT_ID | CUSTOMER_ID | AMOUNT |
|-------------|-------------|--------|
| 1           | 1           | 400    |
| 2           | 2           | 500    |
| 3           | 3           | 700    |
| 4           | 1           | 1000   |
| 5           | 2           | 1200   |
| 6           | 4           | 900    |
| 7           | 3           | 2000   |
| 8           | 2           | 1500   |

```

CREATE PROCEDURE SalesByCustomer
    @CustomerName nvarchar(50)
AS
SELECT c.customer_name, sum(ctr.amount) AS TotalAmount
FROM customers c, contracts ctr
WHERE c.customer_id = ctr.customer_id
    AND c.customer_name = @CustomerName
GROUP BY c.customer_name
ORDER BY c.customer_name
GO

EXEC SalesByCustomer 'CUSTOMER_1'

```
